EDUCATION

Rensselaer Polytechnic Institute | School of Science

Troy, NY

Bachelor of Science in Computer Science | Minor: Economics

May 2027

- **Technical Skills:** Python, Java, C++, Scikit-learn, Pandas, NumPy, GitHub, Backend Systems
- **Letter of Recognition in Graph Theory:** Performance above and beyond that which is necessary for an A grade.

PROJECTS

Digital OC

Football Play Predictor Application

- Collaborated in a team of 8 to build an end-to-end ML system analyzing 10,000+ NFL plays to recommend optimal offensive play calls, spanning data ingestion, model training, and natural language output.
- Engineered a full data pipeline in Pandas including cleaning, normalization, and feature extraction across structured play-by-play data.
- Trained and evaluated multiple Scikit-learn classification models, tuning parameters while comparing accuracy metrics to select the best-performing predictor.
- Applied prompt engineering to translate model outputs into natural language play recommendations, bridging ML predictions with human-readable decision support.
- Designed the system with modularity and scalability in mind, simulating real production ML workflow from raw data to inference.

Professor Paths Program

- Developed a scalable application modeling professor-course relationships as a weighted graph.
- Used Dijkstra's algorithm to compute shortest paths, optimizing performance for large-scale queries.
- Built custom data structures to efficiently handle high-volume data processing and traversal.
- Focused on system design, performance optimization, and clean architecture.

EXPERIENCE/ LEADERSHIP

NYSTEC

New York City, NY

Consulting Fellow

January 2026 – May 2026

- Conducted comprehensive technical audit of Rensselaer Chamber of Commerce website, identifying UX issues, security vulnerabilities, and missing features impacting member acquisition.
- Worked in a pair to deliver recommendations comparing simple website rebuild vs full platform migration.
- Evaluated SaaS alternatives (Wix, HubSpot, etc.) and compared the strengths and weaknesses of each.

Habitat for Humanity

Troy, NY

President

March 2025 – Present

- Organized logistics and timelines for service projects based in the Northeast while working on service projects and improving community engagement.
- Collaborated with fellow committee members and local members to complete active housing projects.
- Led outreach and engagement activities to recruit and retain volunteers while strengthening community impact
